Kion Hydraulic Rotator with Forks is designed to provide continuous 360° rotation in either direction with full speed control. It permits the discharging of liquid, solid, granular & other free flowing materials from containers through rotation. It greatly increases truck versatility since in addition to handling bins designed to be rotated, it also handles standard skids, bins & pallets.

Rotator is driven by a powerful, high pressure, gear type Hydraulic motor driving a worm gear reduction unit. The worm wheel through a pinion rotates a large diameter Ring Gear on which Fork mounting plate is bolted. The Forks are bolted on this plate. Alternatively another Attachment e.g. Bale Clamp can be mounted on this plate.
